

Hand-held multifunction calibrator Models Pascal ET, Pascal ET/IS

WIKA data sheet CT 18.02

Applications

- Calibration service companies and service industry
- Measurement and control laboratories
- Quality assurance

Special features

- Measurement and simulation of the following parameters: pressure, electrical signals (mA, mV, V, Ω), temperature (TC, RTD), frequency and pulse
- Large colour display with touchscreen with new intuitive and user-friendly interface
- Integrated data logger and calibration function
- Option: intrinsically safe version, II 2G Ex ib IIC T4 Gb - T_{amb} : -10 ... +50 °C
- Option: integrated HART® module for communication with HART® instruments

Hand-held multifunction calibrator, model Pascal ET/IS

Description

General

Due to its versatility the hand-held multifunction calibrator Pascal series is ideally suited for on-field testing and calibration of industrial measuring instruments. The typical application is the calibration of pressure transmitters, temperature transmitters, pressure gauges, temperature probes and other measuring instruments. The calibration data are stored in the instrument's memory. The communication with a PC is used to remotely control the unit and to download the calibration reports.

The Pascal ET is the most advanced portable multifunction calibrator for the measurement and simulation of the following parameters: relative and absolute pressure, electrical signals (mA, mV, V, Ω), temperature (TC, RTD), frequency and pulse. In addition, there is the possibility to include an optional HART® module which allows communication with HART® instruments.

Features

The calibrator Pascal ET has a new large colour touchscreen display with a new intuitive and user-friendly interface, that allows an easy and fast configuration of the calibrator. The availability of ATEX approval II 2G Ex ib IIC T4 Gb - T_{amb} : -10 ... +50 °C expands the possible applications of this calibrator into hazardous areas (only for Pascal ET/IS). Even in the ATEX version the DC 24 V voltage supply for external transmitters is available.

The calibrator has four measurement channels and is thus capable to carry out up to four simultaneous measures. For more flexibility on on-field calibrations, the Pascal ET has an on-board memory for data storage that allows the evaluation of logged measuring values and calibration reports. In laboratory applications the real-time communication allows the remote control of the Pascal ET from a PC.

The Pascal ET can be modularly configured with up to two input and two output modules as well as one HART® module and one output module, which are galvanically isolated from each other. The measurement/simulation of the electrical signals or temperature as well as up to two external pressure sensors enables the operator to configure the calibrator according to his specific requirements.

The environmental parameters module (option) is another plus of Pascal ET, it allows the monitoring of the barometric pressure, the ambient temperature and the relative humidity. The values will be stored in the calibration report.

Specifications Models Pascal ET and Pascal ET/IS

Base instrument	
Indication	
Display	Touchscreen + 5 keys
Dimensions	640 x 480 Dots Dot size: 0.06 x 0.06 mm (0.002 x 0.002 in)
Backlight	LED
Electrical input and output	
Number and type	banana-plug inputs for electrical parameters, resistance thermometers and thermocouples
Resistance thermometer (RTD)	Pt100 (385, 3616, 3906, 3926, 3923), Pt200, Pt500, Pt1000 (385, 3916), Ni100, Ni120, Cu10, Cu100
Thermocouples	Types J, K, T, F, R, S, B, U, L, N, E, C
Voltage signal	input: DC \pm 100 mV, \pm 2 V, \pm 80 V output: DC 20 V
Current signal	input: DC \pm 100 mA output: DC 20 mA
Frequency signal	0 ... 50,000 Hz
Pulses signal	1 ... 999,999
Resistance	0 ... 10,000 Ω
Voltage supply	DC 24 V
HART® communication	
HART® module	based on HART® universal and common practice commands
Resistance	HART® resistance 250 Ω (activatable)
Loop current	max. DC 24 mA
Voltage supply	DC 24 V
Pressure connection	
Permissible media	non-corrosive gases and liquids
Temperature compensation	-10 ... +50 °C (14 ... 122 °F)
Temperature coefficient	0.001 % of reading/°C, outside of 19 ... 23 °C (66 ... 73 °F)
Units	bar, mbar, psi, psf, Pa, hPa, kPa, MPa, torr, atm, kg/cm ² , kg/m ² , mmHg (0 °C), cmHg (0 °C), mHg (0 °C), inHg (0 °C), mmH ₂ O (4 °C), cmH ₂ O (4 °C), mH ₂ O (4 °C), inH ₂ O (4 °C), ftH ₂ O (4 °C)
Voltage supply	
Battery type	rechargeable battery NiMH
Battery life (fully-charged)	8 hours for typical usage (without backlighting)
Power supply	AC 100 ... 240 V, 50/60 Hz
Permissible ambient conditions	
Operating temperature	-10 ... +50 °C (14 ... 122 °F)
Storage temperature	-30 ... +80 °C (-22 ... +176 °F)
Relative humidity	Operating humidity: 10 ... 90 % r. h. (non-condensing) Storage humidity: 0 ... 90 % r. h. (non-condensing)

Case	
Material	Front panel aluminium
Ingress protection	IP54
Dimensions	305 x 210 x 90 mm (12 x 8.27 x 3.55 in)
Weight	approx. 3 kg (6 lbs 6 oz)

Ignition protection type for model Pascal ET/ISATEX directive II 2G Ex ib IIC T4 Gb - T_{amb} : -10 ... +50 °C**Connection values**

Max. voltage	$U_0 = 29.7 \text{ V}$
Max. current	$I_0 = 31 \text{ mA}$
Max. power	$P_0 = 0.92 \text{ W}$
Max. effective internal capacitance	$C_0 = 69 \text{ nF}$
Max. effective internal inductance	$L_0 = 30 \text{ mH}$

Power supply circuit

Max. voltage	$U_i = 30 \text{ V}$
Max. current	$I_i = 100 \text{ mA}$
Max. power	$P_i = 0.75 \text{ W}$
Max. effective internal capacitance	$C_i = \text{negligible}$
Max. effective internal inductance	$L_i = \text{negligible}$

Approvals

Logo	Description	Country
	EU declaration of conformity ■ EMC directive EN 61326 emission (group 1, class B) and interference immunity (portable test and measuring equipment) ■ ATEX directive II 2G Ex ib IIC T4 Gb - T_{amb} : -10 ... +50 °C	European Union
	IECEx Hazardous areas Ex ib IIC T4 Gb - T_{amb} : -10 ... +50 °C	International
	EAC ■ Electromagnetic compatibility ■ Low voltage directive	Eurasian Economic Community
	DNOP-MakNII Hazardous areas	Ukraine
	BelGIM Metrology, measurement technology	Belarus

Certificates

Certificate	
Calibration	3.1 calibration certificate per DIN EN 10204 option: ACCREDIA calibration certificate
Recommended recalibration interval	1 year (dependent on conditions of use)

Approvals and certificates, see website

Pressure module

External sensors

(other pressure ranges available on request)

6) Amplitude: 0.1 ... 15 Vrms, frequency: 0.5 ... 200 Hz

HART® module:

- For communication with HART® instruments
- Supports a selected set of HART® universal and common practice commands
- Read basic device information and trim the mA output on most HART® enabled transmitters
- No necessity to use DDL specific libraries
- Integrated 250 Ω resistance
- Integrated 24 V voltage supply

HART® communication:

The Pascal ET offers an optional HART® module with following commands:

- Read unique identifier
- Read current and percentage of range
- Read current and four (predefined) dynamic variables
- Read tag (TAG), descriptor (DD), date
- Read PV sensor information
- Read output information
- Write tag (TAG), descriptor (DD), date
- Enable/disable fixed current mode
- Trim DAC zero
- Trim DAC gain

Resistance thermometer measurement

- One year specifications
- Temperature effect see "Electrical input signal/Resistance"
- Measure current: < 200 µA
- Specification for 4-wire measurements with $I_{\text{meas.}} < 0.2 \text{ mA}$

1) Precision and accuracy of the e.m.f. values

For measurements with internal cold junction compensation: cold junction error = 0.15 °C

Maximum input voltage: DC ±100 V

Input Impedance: > 100 MΩ

Temperature effect: 0.001 % of reading * $|t - t_{c1}|$ for $t : -10^{\circ}\text{C} \leq t \leq 19^{\circ}\text{C}$ and $23^{\circ}\text{C} \leq t \leq 50^{\circ}\text{C}$ and $t_c = 20^{\circ}\text{C}$
 $14^{\circ}\text{F} \leq t \leq 66.2^{\circ}\text{F}$ and $73.4^{\circ}\text{F} \leq t \leq 122^{\circ}\text{F}$ and $t_c = 68^{\circ}\text{F}$

1) Precision and accuracy of the e.m.f. generation

For temperature simulation with internal cold junction compensation: cold junction error = 0.15 °C

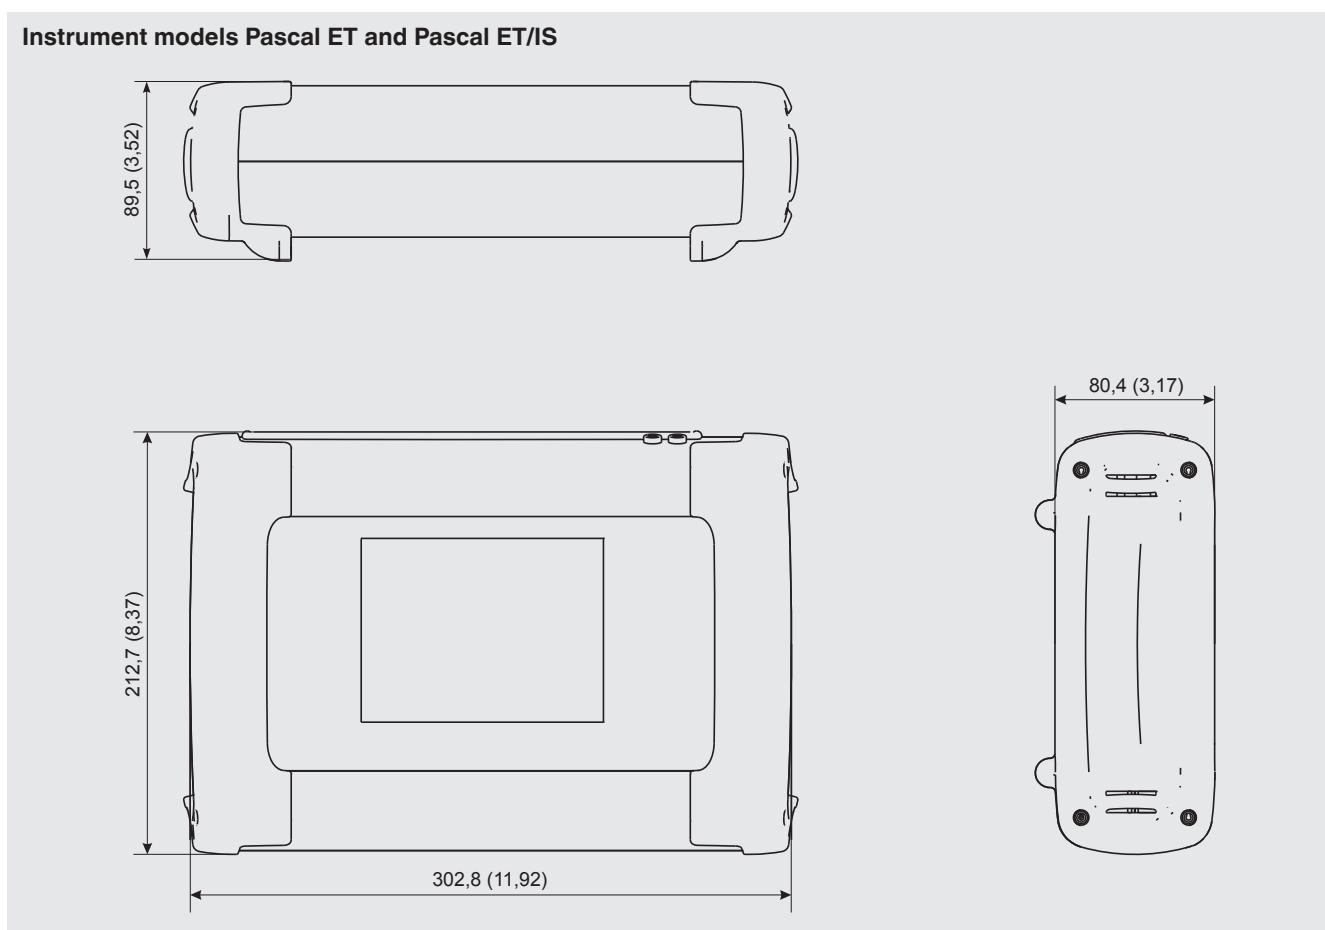

Environmental parameters module

Parameter	Measuring range		Precision	Accuracy	Max. resolution
Temperature	-10 ... +50 °C	(14 ... 122 °F)	2.7 °C (4.86 °F)	3.0 °C (5.4 °F)	0.1 °C (0.18 °F)
Barometric pressure	650 ... 1,150 mbar	(9.43 ... 16.68 psi)	4 % FS	5 % FS	1 mbar (0.015 psi)
Relative humidity	10 ... 90 % r. h.		12 %	15 %	1 %

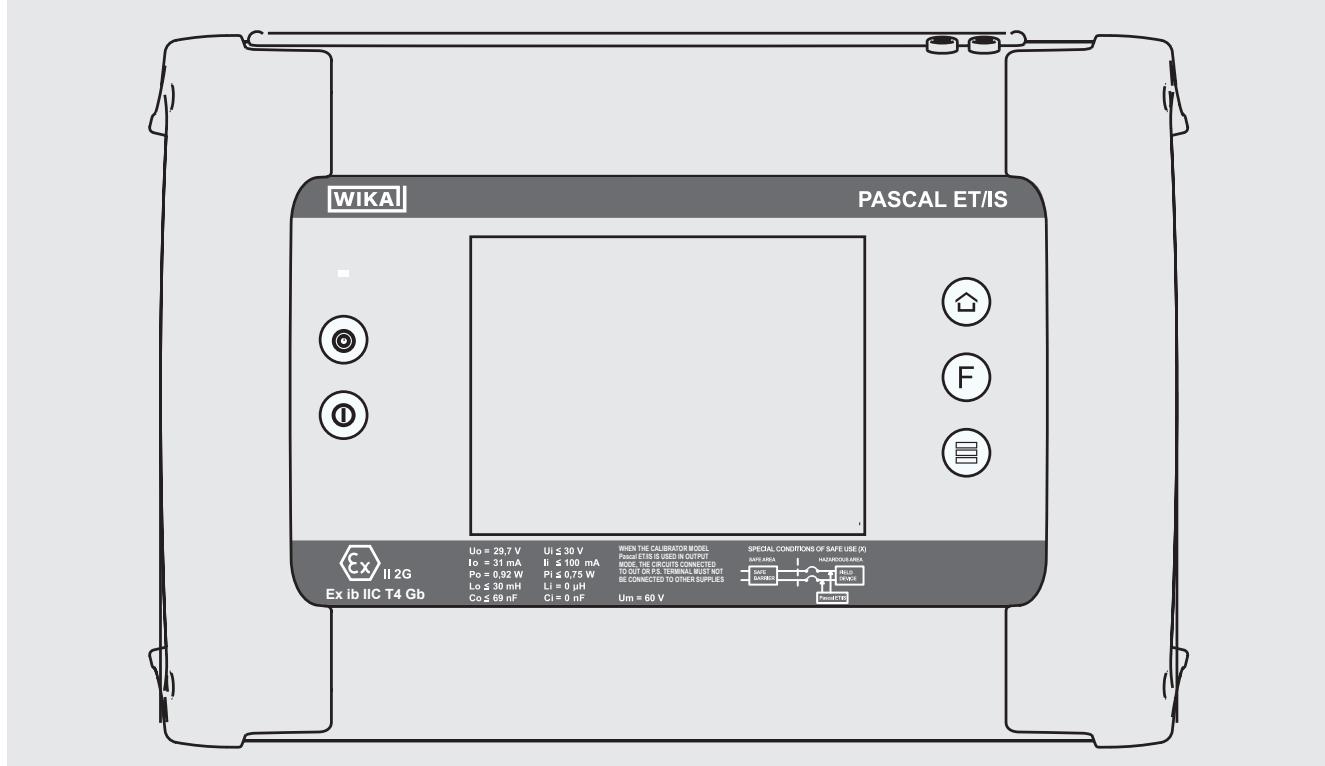

OBSOLETE

Dimensions in mm (in)

Instrument models Pascal ET and Pascal ET/IS

Front panel of model Pascal ET/IS

Software

Pascal report software

The Pascal report software allows the configuration in A4 format of the calibration reports and/or certificates according to users standards.

Importing stored reports from the instrument by RS-232 serial interface/USB (with adapter) makes Pascal report the safer software system to support any calibration procedure according to ISO 9000 standards.

PasLog software

The PasLog software allows the download and the management of the logging data from the instrument to the PC. Data can be displayed and print out in a tabular format as well as in a graphical one. The user interface can be customised.

Scope of delivery

- Portable multifunction calibrator model Pascal ET or Pascal ET/IS
- Operating instructions
- AC adapter
- Pascal report software
- RS-232 interface cable
- RS-232 to USB adapter
- Test-cable set; order no. 241076
- 3.1 calibration certificate per DIN EN 10204

Option

- ATEX approval:
II 2G Ex ib IIC T4 Gb - Tamb: -10 ... +50 °C
- IECEx approval:
Ex ib IIC T4 Gb - Tamb: -10 ... +50 °C
- ACCREDIA calibration certificate
- Environmental parameters module
- Hydraulic test pumps
- Pneumatic test pumps
- PasLog software
